Volume 198 January 1989

CONTENTS

On the breakdown of the wave packet trailing a turbulent spot in a laminar boundary layer. A. Glezer, Y. Katz and I. Wygnanski *page* 1

Pattern-recognition analysis of the velocity field in plane turbulent wakes. J. A. Ferré and Francesc Girault 27

Some topological features of the entrainment process in a heated turbulent wake. J. A. Ferré and Francesc Girault 65

Evolution of locally unstable shear flow near a wall or coast. Melvin E. Stern 79

On the stability of gas bubbles rising in an inviscid fluid. D. I. Meiron 101

Surfing on solitary waves. J. M. Vanden-Broeck and Joseph B. Keller 115

On the first-mode instability in subsonic, supersonic or hypersonic boundary layers. F. T. Smith 127

On the flow of a rotating mixture in a sectioned cylinder. A. A. Dahlkild and H. P. Greenspan 155

A hydrodynamical theory of conservative bounded density currents. M. W. Moncrieff and D. W. K. So 177

Statistical properties of decaying geostrophic turbulence. James C. McWilliams 199

Selective withdrawal from a viscous two-layer system. John R. Lister 231

Modal decomposition of velocity signals in a plane, turbulent wake. B. Marasli, F. H. Champagne and I. J. Wygnanski 255

The stability of unbounded two- and three-dimensional flows subject to body forces: some exact solutions. A. D. D. Craik 275

Phase changes following the initiation of a hot turbulent flow over a cold solid surface. Herbert E. Huppert 293

Wavenumber spectra of short gravity waves. M. L. Banner, Ian S. F. Jones and J. C. Trinder 321

Three-dimensional knot convection in a layer heated from below. R. M. Clever and F. H. Busse 345

On the refraction of shock waves. L. F. Henderson 365

Higher-order modulation effects on solitary wave envelopes in deep water. T. R. Akylas 387

Relaxation and breakup of an initially extended drop in an otherwise quiescent fluid. H. A. Stone and L. G. Leal 399

Topology of a turbulent boundary layer with and without wall suction. R. A. Antonia and L. Fulachier 429

Frictional coastal trapped waves in a two-layered ocean. Humio Mitsudera and Kimio Hanawa 453

Nonlinear dynamics in Langmuir circulations and in thermosolutal convection. Sydney Leibovich, Sanjiva K. Lele and Irene M. Moroz 471

Stability of free-convection flows of variable-viscosity fluids in vertical and inclined slots. Yen-Ming Chen and Arne J. Pearlstein 513

Modulated stagnation-point flow and steady streaming. Gregory J. Merchant and Stephen H. Davis 543

Geometry of self-propulsion at low Reynolds number. Alfred Shapere and Frank Wilczek 557

Efficiencies of self-propulsion at low Reynolds number. Alfred Shapere and Frank Wilczek 587
